

# Aus dem Benelux: Batavia

Beitrag von „President Yaakov“ vom 30. Mai 2012, 19:27

My Country the [C.S.E](#) is also English languished as are our neighbours in [Gjörovnogrod](#).  
We have a commercial Space program which is in the Hands of Two larger companies.  
The time of fossil fuel lies far (1915) the Nuclear is ending now ,most of us re using alternative energy next to cold-fusion.  
New is the Cobalt "changer" energy.

We are the only one with a Orbital Moon station ([Tiglat Pilesar](#)), many view us unrealistic or Sifi like which we actually ain't..we have developed a "parallel" technique and society.
